Looking for someone with IDEAS?

Independence
- Give me an objective and set me loose

Drive
- Continue improving and taking on responsibilities

Empathy
- Always consider the other point of view

Analytical Skills
- Isolate complexity to get to the core issue

Synthesis
- Find the link between different disciplines

Children's Grocery Store Game
Fall 2017

Swatchbook
Spring 2014

Website Redesign
Spring 2016

Gas Station Redesign
Fall 2017

"My favorite part of design is the process of synthesis—pulling together your knowledge, the requirements, different inputs, and a spark of creativity.

The best and most difficult part is—'until you can't do it anymore.' Feedback and input from others is crucial to come up with the best design."
